

E-bike compliance for California K–12 districts.

A complete permitting, training, and compliance platform — at \$0 to your district. Funded by a small parent permit fee, not your budget.

150K+	200%	\$0
CA student e-bikes on the road today	Increase in Carlsbad e-bike crashes, 2019–2022	Cost to your district. Ever.

The compliance gap

California law changed in 2026, and most districts have no system to verify who is authorized to ride, who has been warned, and who is a documented liability. Paper waivers, spreadsheets, and ad-hoc emails do not survive a serious incident.

What RidePermit™ does

- **Digital permit & renewal** — parent-completed application with student, bike, and guardian data.
- **CHP-aligned safety training** — documented and timestamped for every permitted student.
- **Sticker scanning & verification** — staff and SROs verify a permit in under five seconds.
- **Compliance dashboard** — live roster, warnings, revocations, and per-school risk index.
- **Audit-ready records** — exportable logs for legal, insurance, and board reporting.

Commercial model

Free to your district. No platform fee, no per-student license, no procurement. Parents pay a small permit fee (\$25 new / \$15 renewal) at enrollment.

Optional sponsorship. Districts may choose to cover permit fees for some or all students. Invoiced only for sponsored permits actually issued. Net 30, PO required, no card on file.

Security & data posture

- Multi-tenant isolation per district, enforced at the database row level.
- Role-based access: parent, school admin, district admin, platform admin.
- FRL / eligibility data is never stored. Sponsorship is a simple per-student toggle.
- Full audit log for every sponsorship and billing change.

Rollout

- **Week 1** — District onboarding call, schools and admins provisioned.
- **Week 2** — Parent communication sent, enrollment opens.

- **Week 3+** — Stickers issued, dashboard live, staff scanning in the field.
